

# Xcode自定义快捷键

## Xcode自定义快捷键

使用Xcode有时候需要对行进行操作，例如剪切当前行、复制当前行等，Xcode(版本4.5.1)提供定义了文本编辑快捷方式，

### (1) 修改权限

```
sudo chmod 666
```

```
/Applications/Xcode.app/Contents/Frameworks/IDEKit.framework/Resources/IDETextKeyBindingSet.plist
```

```
sudo chmod 777
```

```
/Applications/Xcode.app/Contents/Frameworks/IDEKit.framework/Resources/
```

### (2) 增加快捷操作

用Property List Editor打开IDETextKeyBindingSet.plist，新增如下键值对

Writing Direction	Dictionary	(6 items)
New Added Shortcuts	Dictionary	(4 items)
Cut Current Line	String	selectLine:, cut:, moveToEndOfLine:, deleteBackward:
Copy Current Line	String	selectLine:, copy:, moveToEndOfLine:
Delete Current Line	String	deleteToBeginningOfLine:, moveToEndOfLine:, deleteToBeginningOfLine:, deleteBackward:, moveDown:, moveToBeginningOfLine:
Duplicate Current Line	String	selectLine:, copy:, moveToEndOfLine:, insertNewline:, paste:, deleteBackward:

Cut Current Line - selectLine:, cut:, moveToEndOfLine:, deleteBackward:

Copy Current Line - selectLine:, copy:, moveToEndOfLine:

Delete Current Line - deleteToBeginningOfLine:, moveToEndOfLine:,

deleteToBeginningOfLine:, deleteBackward:, moveDown:, moveToBeginningOfLine:

Duplicate Current Line - selectLine:, copy:, moveToEndOfLine:, insertNewline:, paste:, deleteBackward:

### (3) 重启Xcode，定义新增操作的快捷键
